

Dear FCC,

As an XM Satelite Radio subscriber, I greatly benefit from the variety offered by the service. I rely on the traffic and weather information provided by XM. The quality and variety offered by Satelite radio is vastly better than that provided by AM/FM radio services. I pay for Satelite radio and it should not be up to the National Association of Broadcasters to decide or affect my choices of content. They are clearly motivated by money alone and are going against what is in the best interest of the consumer. Please do not let the NAB walk all over the freedoms provided by the first amendment. Please REJECT NAB's petition 04-160.

Sincerely,
Tara Joyce
